HEAD PRO PLAYERS MAY PLAY WITH DIFFERENT RACQUETS FROM THE MODEL SHOWN.

AUXETIC 2.0

Feel every shot and get more confidence in your game with HEAD Auxetic 2.0 technology. It actively responds, giving real-time, super-accurate feedback. It really is SENSATIONAL.

WHAT IS AUXETIC 2.0?

Auxetic engineering gives a unique experience compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions expand when a "pull" force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction. The Auxetic cage means you feel the impact right when and where the action happens, it is the ultimate connection between player and racquet.

WHERE IS IT LOCATED?

Auxetic 2.0 is designed to react to ball impact and give the best contact feel by adapting its internal structure. Based on extensive research, we optimized its placement in both the carbon engineered yoke of the racquet and at the end of the grip. Double the connection and double the engineering in every swing.

AUXETIC CAGE

Our revolutionary carbon structure within the end grip utilises Auxetic 2.0 technology for the ultimate connection between you and your racquet, giving a FEEL like never before.

GRAPHENE INSIDE

Strategically positioned in most of our racquets, GRAPHENE strengthens the frame, provides greater stability and optimises energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE inside.

WHAT IS THE BENEFIT?

Auxetic 2.0 actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a large force is applied to the yoke piece, caused by the strings pulling it towards the center of the racquet. Depending on where the ball impacts the string bed, the force will be applied at different locations in the yoke piece.

RACQUET SUBTECHS

SPEED BEAM

The aerodynamic cross-section of the Speed beam maximizes swingspeed and power.

VARIABLE BEAM

The variable beam cross-section perfectly balances the power, control and spin of the racquet.

ELLIPTICAL BEAM

The elliptical cross section in the shoulder area creates more flex during impact and enhances feel.

MORPH BEAM

The unique frame construction merges an elongated box beam shaft with a powerful head for the perfect blend of feel and ease on court.

BOX BEAM

The box beam cross-section stabilizes the frame for maximum control.

FLEX GROOVE

The deeper flex groove softens the cross section geometry in the shoulder area for enhanced impact feel.

ELONGATED SHAFT

Elongated shaft for classic flex and feel appreciated on Tour since 1987.

SPIN SHAFT

The spin shaft provides optimized lateral stability, creating higher spin potential.

FULL CAP

Full cap for signature impact feel and unmistakable sound.

SPEED PATTERN

A special speed string pattern provides with the perfect mix of power under control.

SPIN PATTERN

The open 16/19 string pattern maximizes string snap-back for greater spin generation.

CONTROL PATTERN

A more dense 16/19 string pattern provides the perfect mix of control and power.

UNI PATTERN

The specially designed uniform string pattern allows for a consistent ball trajectory on every shot for reliable and forgiving play.

SPIN GROMMETS

Spin grommets allow for greater main string movement in all directions for maximizing power and spin.

SOUND GROMMETS

Sound grommets provide enhanced power via greater string movement and optimize sound and vibrations.

POWER GROMMETS

The enlarged power grommets maximize string movement for increased power.

DIRECTIONAL DRILLING

Directional drilling combine increased power and sweetspot, delivering a plush impact feel.

SWEET ZONE

The special sweetzone is created through a rounded head shape with the widest stringbed section raised to the tip for modern play.

SPEED RACQUETS

SPEED RACQUETS

That winning feeling, a split-second faster

Built for speed, and for a fast swing, this bestselling racquet has been upgraded with new Auxetic 2.0 technology for sensational, softer feel. The refresh includes a new design with a special surface coating that is soft to the touch, complementing the outstanding impact feel. From the PRO and MP to the MP L and the completely remodelled TEAM, a SPEED racquet lets you play fast while enjoying a softer, more comfortable feeling. A winning feeling.

TENNIS ***FOOTWEAR***

FOOTWEAR TECHNOLOGIES

COMFORT

ORTHOLITE®
With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

HEAD TRI-NRG
HEAD's complete support technology. First, NRG Neutralizes impact in the heel area, then it is Rigid in the midfoot area for excellent torsional support properties and densities in each area of the shoe are key elements in this HEAD footwear technology.

HEAD COOLING SYSTEM
Perforations in the outsole, midsole and sock-liner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

DYNAFOAM
Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

SOCK SUPPORT SYSTEM
Fully integrated elastic sock construction for initial comfort and better support.

STABILITY

DELTA STRAP
Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD LOCKDOWN STRAP
Midfoot straps integrated into the lacing system keep your foot in place.

HEAD LATERAL CONTROL+
Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

HEAD HEEL STABILIZER 180°
TPU Brace that wraps around the heel for best fit and support.

HEAD LATERAL CONTROL
HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD T-KORE 360°
Highlighted by the shoe's design, HEAD T-KORE 360° brings together the performance technologies that ambitious players need. The innovations give your shoe a core strength, with enhanced stability, abrasion resistance and torsional support.

DURABILITY

HEAD HYBRASION+
A special rubber compound developed for padel shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

SUPERFABRIC®
Extremely abrasion resistant and at the same time really flexible upper material.

HEAD HYBRASION
Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

HEAD DRIFT DEFENSE
In order to have a complete durable shoe, the upper of a padel shoe needs to be durable as well, especially around the toe and medial forefoot area. HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defence technology to protect this area during aggressive toe drags.

SPRINT PRO 3.5 SF

Upgraded with the radical SuperFabric® material this shoe mixes lightweight performance with extraordinary durability.

NAME STRUCTURE

To make it easier to find the right bag, we have created a new naming structure. Every bag's name now starts with the segment followed by the silhouette, size and color.

With this new, clearer structure, customers can more easily find the bag to suit their needs. There is more flexibility when choosing the bag that is right for you, with more and better combinations.

STRING BASICS

MONOFILAMENT

Monofilament strings have a simple construction, as they are extruded as a single filament that is stretched until the desired diameter or dimension is obtained. They are highly engineered products, due to the special Polyester material and the additives which are combined in complex production processes enhancing specific properties.

The elasticity of these strings provides excellent control and spin, and the combination of structure and material guarantees long lasting performance for high level players. The cross section can be engineered in a variety of ways: shaped to increase bite on the ball and spin potential, and coated to maximize wear resistance and improve string movement.

HYBRID

Hybrids are made by a combination of different strings in the mains and in the crosses of the racquet. The difference between mains and crosses lies in material, dimension, construction or shape.

In this combination the main strings primarily determine the spin potential, the control, and the overall feel and durability of the string bed. The cross strings are responsible for the comfort level, the power, and the outgoing angle that affects the trajectory of the ball.

The hybrid string setup allows players to combine the benefits of each individual string, based on its placement in the mains and crosses.

MULTIFILAMENT

Multifilament strings are complex. They are a twisted construction with hundreds or even thousands of synthetic microfilaments.

These micro-filaments can be different dimensions, shapes or materials. HEAD uses traditional round filaments and also specially engineered ribbons. The micro-filaments are assembled within a synthetic resin matrix to create a softer impact feeling or more lively touch. The strings are then coated with a thin layer of thermoplastic material, with special additives that increase wear resistance and ensure perfect realignment after every shot. Multifilament strings are very arm friendly, comfortable and powerful, providing a high level of performance.

SOLID CORE WITH OUTER WRAPS

This type of string features a solid core monofilament nylon construction. It offers variable sizes, different dimensions, or can be co-extruded with other thermo-plastic materials.

The core is encased by one or more wraps of microfilaments with varying diameters or materials, and the construction is coated with one or more layers of thermo-plastic materials. Special additives are included to reduce the friction of the surface and to increase the durability.

These strings provide a crisper feel compared to multifilament strings and a more balanced combination of power and control. These strings offer a great all-around playability for a wide range of players.

- Phone or Tablet holder on Tensionhead

DIAGNOSTIC CENTER

**4 IN 1
DIAGNOSTIC
CENTER**
ART NO 285494

DIAGNOSTIC CENTER

4 in 1 Swingweight Machine/Diagnostic Center

The 4 in 1 diagnostic center is the first machine able to measure the weight, the swingweight, the twistweight (MOI) and the balance of several type of racquets: tennis, padel, squash, pickleball, racquetball.

The machine automatically sets up when the length selector is adjusted for long or short racquets. The patent pending clamp is able to hold any type of racquet horizontally or vertically, allowing different type of measurements.

The machine has also a small scale, useful to measure the lead tape weight for the customization. A calibration bar is provided to ensure the accuracy of all measurements.

MINI TENNIS NET 6.1 M

HEAD's 10 and Under Tennis Net is perfect for kids just getting into the game. With its easy set-up, tennis can be played from home or at a 10 and Under Tennis tournament at your local club.

ART. NO. 287222

REPLACEMENT NET 6.1 M

HEAD's 10 and Under Tennis Replacement net is a perfect clone of the original providing a sturdy net for 10 and Under Tennis play.

ART. NO. 287232

TIP LINES

The times of crepe or even duct tape on the court are over. T.I.P. LINES is the super easy and secure tool to set up smaller courts for kids' tennis.

ART. NO. 287261

TIP NET BELT

It's easy to adjust the net with the TIP NET BELT, which is now more durable and offered in white with a black logo, in keeping with the ITF's rules.

ART. NO. 287562

COACHING PACK

1 bag, 6 big cones, 12 poles with 8 clips, 12 court lines, 4 court edges, 6 targets, 1 small bag for transportation and 1 HEAD Coaching Poster

ART. NO. 287241

BALL BASKET + SEPARATOR

The solid ball basket is perfect for coaches to reach balls during practice and store them for later.

ART. NO. 287251

HEAD BALL TROLLEY

The BALL TROLLEY and its many flexible features is the ultimate storage for balls during and in between training.

ART. NO. 287262

BALL TROLLEY - ADD. BAG

This BALL TROLLEY - ADDITIONAL BAG is a spare bag for the BALL TROLLEY and allows added flexibility.

ART. NO. 287272

AGILITY LADDER

The AGILITY LADDER helps you improve your fitness.

ART. NO. 287501

6 BIG CONES

The CONES are a great tool for all kinds of practice exercises on the tennis court.

ART. NO. 287511

6 TARGETS

Having a target is making the shot easier. These 6 slim yellow TARGETS are great to set up different exercises.

ART. NO. 287521

12 COURT MARKS / 4 COURT EDGES

Need a quick court? Use the COURT MARKS and COURT EDGES for a quick set-up or other coaching exercises.

ART. NO. 287531
